

Ultra•Form™ MATTRESS OVERLAYS

Ultra•Form Mattress Overlay
with DuraBlue Cover

Pressure Relief for Treatment and Prevention

The Ultra•Form Mattress Overlay is a high performing pressure relief device that helps prevent pressure ulcers in high risk patients and can be effective in the treatment of pressure ulcers in stage 1 or 2. Ultra•Form is most effectively used when you need more than just comfort, but less than an expensive specialty bed.

Hundreds of individual cells conform to the contours of the body, meeting the exact demands of each patient. Each individual cell has low resistance to “cradle” a bony area while the surrounding network of cells disperse the pressure. Patient comfort is greatly enhanced, unlike fluid or air filled products, Ultra•Form is very stable and pressure relief characteristics do not change when the bed is elevated or lowered.

The Ultra•Form Mattress Overlay has two different cover options to better service the need of the patient. Our Protect™ cover is a unique “breathable” polyurethane cover which transfers heat away from the patient, while protecting the product from moisture. This is an appropriate option for short term, single patient use. Ideal for long term use, the DuraBlue™ cover is a urethane coated nylon, which is waterproof, flame resistant and treated with an anti-microbial process.

BENEFITS

- Self Adjusting
- “Cradling” Effect
Correctly Disperses
Patient Weight
- Unique Heel Section
Achieves Lowest
Pressure Possible
- Easily Portable

FEATURES

- Assorted Sizes Available
- Cover Options:
Protect™ cover
or DuraBlue™ cover
- 1 year Warranty
- Made in the USA
